Author index

Volume 63 (2001)

Aasly, J. **63**, 123
Abidi, S.S.R. **63**, 5
Aoki, N. **63**, 41
Arocha, J.F. **63**, 147

Barreto, J.M. **63**, 19
Brasil, L.M. **63**, 19

Colnaric, M. **63**, 51
Cundell, D.R. **63**, 31

de Azevedo, F.M. **63**, 19
Demšar, J. **63**, 41
Denault, A.Y. **63**, 91
Deneault, L.G. **63**, 91
Diermeier, M. **63**, 147
Dorda, W. **63**, 133
Druzovec, M. **63**, 51
Duftschmid, G. **63**, 133

Gall, W. **63**, 133
Granchi, T.H. **63**, 41
Gyorkos, J. **63**, 51

Hleb Babi, Š. **63**, 1
How, J. **63**, 147

Kokol, P. **63**, 1, 109

Lhotska, L. **63**, 1, 61
Liu, Y.-C.A. **63**, 169

Marik, V. **63**, 61
Mikkelsen, G. **63**, 123
Mikulich, V.J. **63**, 169
Mottur-Pilson, C. **63**, 147
Muñiz, J. **63**, 77

Nettleton, D. **63**, 77

Ojsteršek, M. **63**, 109

Paré, G. **63**, 205
Parmanto, B. **63**, 91
Patel, V.L. **63**, 147
Peterson, M. **63**, 109
Podgorelec, V. **63**, 109

Robert Beck, J. **63**, 41

Saletic, D.Z. **63**, 101
Saletic, S.Z. **63**, 101
Sanders, R. **63**, 31
Schriger, D.L. **63**, 169
Sicotte, C. **63**, 205
Silibovsky, R.S. **63**, 31
Snyder-Halpern, R. **63**, 179
Šprogar, M. **63**, 109
Steinfeldt, J. **63**, 169
Stepankova, O. **63**, 1
Sztandera, L.M. **63**, 31

Velasevic, D.M. **63**, 101
Vlcek, T. **63**, 61

Wall, M.J. **63**, 41
Welzer, T. **63**, 51

Zorman, M. **63**, 109
Zupan, B. **63**, 41

Subject index

Volume 63 (2001)

Aggregation; Questionnaire screening; Sleep apnea diagnosis; Relevance and reliability weights; Grade of membership; Categorical and scalar representation **63**, 77

Bacterial infections; Diagnosis; Intelligent medical system **63**, 31

Blackboard control; Diagnostic expert system; Taxonomy control structure; Inheritance mechanism; Multi-agent approach; Medical applications **63**, 61

Categorical and scalar representation; Questionnaire screening; Sleep apnea diagnosis; Relevance and reliability weights; Aggregation; Grade of membership **63**, 77

Cinical data retrieval; Temporal query; Temporal aggregate; Temporal grouping **63**, 133

Clinical guidelines; Computer-aided diagnosis; Electronic chart systems; Physician learning; Expert system **63**, 169

Clinical monitoring; Decision support system; Machine learning; Neural networks; Time series **63**, 91

Clinical practice guidelines; Expertise; Decision-making; Cognitive research **63**, 147

Cognitive research; Clinical practice guidelines; Expertise; Decision-making **63**, 147

Computer-aided diagnosis; Electronic chart systems; Physician learning; Clinical guidelines; Expert system **63**, 169

Computerized patient records; Medical records; Healthcare quality assurance; Data quality; Information management **63**, 123

Damage control; Severe traumatic injury; Data mining; Feature mining; Machine learning; Medical prognostic models **63**, 41

Data mining; Knowledge management; Decision-support; Healthcare enterprise memory; Strategic decision-support services; Healthcare delivery info-structure **63**, 5

Data mining; Severe traumatic injury; Damage control; Feature mining; Machine learning; Medical prognostic models **63**, 41

Data quality; Medical records; Computerized patient records; Healthcare quality assurance; Information management **63**, 123

Decision-making; Clinical practice guidelines; Expertise; Cognitive research **63**, 147

Decision-making; Fuzzy sets; Health care; Respiratory disturbance **63**, 101

Decision-support; Knowledge management; Data mining; Healthcare enterprise memory; Strategic decision-support services; Healthcare delivery info-structure **63**, 5

Decision support system; Clinical monitoring; Machine learning; Neural networks; Time series **63**, 91

Decision trees; Orthopaedic fractures; Neural networks **63**, 109

Diagnosis; Bacterial infections; Intelligent medical system **63**, 31

Diagnosis; Neuro-fuzzy systems; Hybrid systems; Knowledge acquisition; Epilepsy; Genetic algorithm **63**, 19

Diagnostic expert system; Blackboard control; Taxonomy control structure; Inheritance mechanism; Multi-agent approach; Medical applications **63**, 61

Diagnostic space; Model-based diagnostics; Minimal diagnostic space; Qualitative model **63**, 51

PII: S1386-5056(01)00187-3

Electronic chart systems; Computer-aided diagnosis; Physician learning; Clinical guidelines; Expert system **63**, 169

Epilepsy; Neuro-fuzzy systems; Hybrid systems; Knowledge acquisition; Diagnosis; Genetic algorithm **63**, 19

Expertise; Clinical practice guidelines; Decision-making; Cognitive research **63**, 147

Expert system; Computer-aided diagnosis; Electronic chart systems; Physician learning; Clinical guidelines **63**, 169

Feature mining; Severe traumatic injury; Damage control; Data mining; Machine learning; Medical prognostic models **63**, 41

Fuzzy sets; Health care; Decision-making; Respiratory disturbance **63**, 101

Genetic algorithm; Neuro-fuzzy systems; Hybrid systems; Knowledge acquisition; Epilepsy; Diagnosis **63**, 19

Grade of membership; Questionnaire screening; Sleep apnea diagnosis; Relevance and reliability weights; Aggregation; Categorical and scalar representation **63**, 77

Healthcare delivery info-structure; Knowledge management; Data mining; Decision-support; Healthcare enterprise memory; Strategic decision-support services **63**, 5

Healthcare enterprise memory; Knowledge management; Data mining; Decision-support; Strategic decision-support services; Healthcare delivery info-structure **63**, 5

Health care; Fuzzy sets; Decision-making; Respiratory disturbance **63**, 101

Healthcare quality assurance; Medical records; Computerized patient records; Data quality; Information management **63**, 123

Hospital information systems; Information technology sophistication; Measurement instrument validation; Information technology profile **63**, 205

Hybrid systems; Neuro-fuzzy systems; Knowledge acquisition; Epilepsy; Diagnosis; Genetic algorithm **63**, 19

Information management; Medical records; Computerized patient records; Healthcare quality assurance; Data quality **63**, 123

Information technology profile; Hospital information systems; Information technology sophistication; Measurement instrument validation **63**, 205

Information technology sophistication; Hospital information systems; Measurement instrument validation; Information technology profile **63**, 205

Information technology/system innovation; Organizational change; Organizational evaluation **63**, 179

Inheritance mechanism; Diagnostic expert system; Blackboard control; Taxonomy control structure; Multi-agent approach; Medical applications **63**, 61

Intelligent medical system; Diagnosis; Bacterial infections **63**, 31

Knowledge acquisition; Neuro-fuzzy systems; Hybrid systems; Epilepsy; Diagnosis; Genetic algorithm **63**, 19

Knowledge management; Data mining; Decision-support; Healthcare enterprise memory; Strategic decision-support services; Healthcare delivery info-structure **63**, 5

Machine learning; Clinical monitoring; Decision support system; Neural networks; Time series **63**, 91

Machine learning; Severe traumatic injury; Damage control; Data mining; Feature mining; Medical prognostic models **63**, 41

Measurement instrument validation; Hospital information systems; Information technology sophistication; Information technology profile **63**, 205

Medical applications; Diagnostic expert system; Blackboard control; Taxonomy control structure; Inheritance mechanism; Multi-agent approach **63**, 61

Medical prognostic models; Severe traumatic injury; Damage control; Data mining; Feature mining; Machine learning **63**, 41

Medical records; Computerized patient records; Healthcare quality assurance; Data quality; Information management **63**, 123

Minimal diagnostic space; Model-based diagnostics; Diagnostic space; Qualitative model **63**, 51

Model-based diagnostics; Diagnostic space; Minimal diagnostic space; Qualitative model **63**, 51

Multi-agent approach; Diagnostic expert system; Blackboard control; Taxonomy control structure; Inheritance mechanism; Medical applications **63**, 61

Neural networks; Clinical monitoring; Decision support system; Machine learning; Time series **63**, 91

Neural networks; Orthopaedic fractures; Decision trees **63**, 109

Neuro-fuzzy systems; Hybrid systems; Knowledge acquisition; Epilepsy; Diagnosis; Genetic algorithm **63**, 19

Organizational change; Information technology/system innovation; Organizational evaluation **63**, 179

Organizational evaluation; Organizational change; Information technology/system innovation **63**, 179

Orthopaedic fractures; Neural networks; Decision trees **63**, 109

Physician learning; Computer-aided diagnosis; Electronic chart systems; Clinical guidelines; Expert system **63**, 169

Qualitative model; Model-based diagnostics; Diagnostic space; Minimal diagnostic space **63**, 51

Questionnaire screening; Sleep apnea diagnosis; Relevance and reliability weights; Aggregation; Grade of membership; Categorical and scalar representation **63**, 77

Relevance and reliability weights; Questionnaire screening; Sleep apnea diagnosis; Aggregation; Grade of membership; Categorical and scalar representation **63**, 77

Respiratory disturbance; Fuzzy sets; Health care; Decision-making **63**, 101

Severe traumatic injury; Damage control; Data mining; Feature mining; Machine learning; Medical prognostic models **63**, 41

Sleep apnea diagnosis; Questionnaire screening; Relevance and reliability weights; Aggregation; Grade of membership; Categorical and scalar representation **63**, 77

Strategic decision-support services; Knowledge management; Data mining; Decision-support; Healthcare enterprise memory; Healthcare delivery info-structure **63**, 5

Taxonomy control structure; Diagnostic expert system; Blackboard control; Inheritance mechanism; Multi-agent approach; Medical applications **63**, 61

Temporal aggregate; Cinical data retrieval; Temporal query; Temporal grouping **63**, 133

Temporal grouping; Cinical data retrieval; Temporal query; Temporal aggregate **63**, 133

Temporal query; Cinical data retrieval; Temporal aggregate; Temporal grouping **63**, 133

Time series; Clinical monitoring; Decision support system; Machine learning; Neural networks **63**, 91
